- Created and curated high-quality content for social media platforms, including graphics, videos and captions

RESEARCH EXPERIENCE

Production and Physiochemical Analysis of Palm Kernel Oil

- This study is a comparative analysis on the physiochemical properties and chemical composition of palm kernel oil.
- The extraction of the oils and determination of physiochemical properties were done employing established methods.
- The chemical compositions for both oils were ascertained with a Gas chromatography-mass spectrometry (GC-MS).
- The results attest to its usefulness in food and in manufacturing industry.

DYES AND PIGMENT

- This Study explored the fundamental principles and applications of dyes and pigments, examining their chemical composition, properties and uses in various industries.
- The findings of this study contribute to a deeper understanding of the relationship between dyes and pigment.
- Both dyes and pigments are colored, because they absorb only some wavelengths of visible light.
- Dyes are usually soluble in water whereas pigments are insoluble. Some dyes can be rendered insoluble with the addition of salt to produce a lake pigment.
